

MAXIMO APPLICATION SUITE (MAS)

Everything you need to know before upgrading

What is it?

The term Maximo Application Suite mainly refers to a change in **licensing structure, application accessibility, and technology use**. Maximo's traditional functionality and user experience will remain the same.

1. **Licensing:** MAS is designed to take advantage of concurrent use and is therefore licensed via AppPoints, which are pooled and expended based on different active user types:

Premium Concurrent User 15 AppPoints	Base Concurrent User 10 AppPoints	Limited Concurrent User 5 AppPoints	Self Service Concurrent User 0 AppPoints
			
Manage Industry Solutions • O&G, Aviation, Transportation, Utilities, Nuclear, Civil Infrastructure Add-ons • ACM, SP, HSE Predict Health and Predict - Utilities Visual Inspection	Manage Includes: • Linear • Calibration • Spatial (requires install) Scheduler Health Safety	3 Modules: • Manage • Manage Industry Solutions • Manage Add-ons Mobile • Maximo Mobile • Assist • Anywhere • 3rd Party Monitor	Self service Applications
Install – 1 AppPoint (multiplier)	SAP/Oracle Connector (x80)	Spatial (x20)	Civil Infrastructure (x50)
	Visual Inspection (x45)	Edge (1 pkg 5)	Assist (x150)
	Health & Predict - Utilities (x60)		

2. **Applications:** With MAS, all applications are available for installation within one suite. You can install everything at once initially or introduce new applications over time.
3. **Technology:** MAS utilizes Red Hat OpenShift, a containerization software that provides a secure, flexible foundation for IT infrastructure as your business needs grow and change.

Who should upgrade?

- Clients adding users
- Clients wanting more functionality
- Clients wanting to improve management of users or move towards a concurrent model. (Points are easier to manage than named users in the system.)

Note: Maximo 7.6.1 is not going away!

Why Aqutas?

Introducing MAS doesn't need to be a complex undertaking that requires a drain on your resources and a complete restructuring of your program. Leave the technical work to us with our premier support offering:

1Source[®]
A Premier Support Experience

Aqutas Support is best-in-class – made up of industry leading expertise that will help make your transition easy and painless.

MAS is sold **perpetually** or via **Subscription Term License (STL)**. What about SaaS? You can take advantage of IBM's Managed Services offering or purchase through a third party
