AQUITAS SOLUTIONS

DATA GOVERNANCE WITH PARTLINQ

Standardize inventory management, identify duplicates quickly, and provide multilingual support with Partlinq.

OVERVIEW

Often times, maintenance teams must conduct routine data assessments in order to cleanse data that has resulted from their deficient data management processes.

Partlinq is a web-based data management solution that enhances your organization's maintenance data quality with fully customizable workflows and integration with your EAM system. It standardizes inventory management and governance, identifies duplicates faster, and prevents waste by organizing all of your MRO in one, intuitive platform.

Step 1:
Conduct a **Data Audit** to assess the quality of your data

Step 2:
Inventory Walkdowns, Cleansing, & Enrichment

Step 3:
Establish standardized processes for MRO data with **Partlinq**

PARTLINQ FEATURES

- ✓ Enforce data governance rules
- ✓ Intuitive interface to simplify item creation
- ✓ Associate MRO items to assets & equipment
- ✓ Highly customizable item approval workflow
