**Aqitas' Connected Maintenance Solution Places Second as Plant Engineering Magazine's
Product of the Year for Maintenance Software**

Company recognized for best in class IIoT offering for maintenance organizations

May 8, 2020

ROSWELL, Ga. – Aquitas Solutions, a leading provider of Enterprise Asset Management (EAM) and IoT solutions that optimize asset intensive industries, announced today that their [Connected Maintenance](#) solution has received the silver award for Maintenance Software Product of the Year from [Plant Engineering Magazine](#). Each year, the program honors the best innovators in maintenance, manufacturing and mechanics – as voted by the audience of Plant Engineering.

“It’s exciting to witness the digital revolution that’s taking place, and we are proud to be a part of it by offering this critical data and connection agnostic solution for maintenance organizations to transform the efficiency and effectiveness of operations on the plant floor.” Maddy Hawkins, Director of IoT Sales at Aquitas stated. “This achievement provides validation of the value that is possible through Connected Maintenance and encourages us to continue exploring additional use cases and applications that offer competitive advantages to our customers.”

To be recognized alongside some of the greatest companies in Asset Management, Safety, Energy, Electrical Motors, and more is an outstanding accomplishment for Aquitas and demonstrates the growth of their Connected Maintenance solution over the last two and a half years. Their IoT Team has invested heavily in building a successful, reliable maintenance software solution that integrates [PTC's](#) Industrial IoT ThingWorx platform with [IBM's](#) Maximo Asset Management. The success of this integration has led them to expand their Connected Maintenance offering beyond Industrial IoT into Augmented Reality. They hope to bring IoT and AR to the forefront of modern maintenance strategy by demonstrating the value of reduced downtime, improved reliability and PM optimization, and remote assistance.

Aqitas is honored by this acknowledgement and will use this recognition to continue educating the market about IoT and AR in order to drive digital transformation in the asset management space. A complete list of Product of the Year winners is featured on Plant Engineering's [website](#).
